Hyderabad, India · Relocating to Berlin / Amsterdam

Visa: eligible for EU Blue Card & NL Highly Skilled Migrant sponsorship

PROFILE

For 12+ years I've been turning "this screen is confusing" into "oh, that's easy." I lead a team of 5 designers at Hitachi Vantara, shaping 5 presales engineering tools used by sales engineers around the world. I'm design-systems-first and mildly obsessed with reuse: build the component once, use it everywhere, and never redraw the same button twice. I bring 3–4 directions instead of one "final" answer, treat every stakeholder meeting as free research, and can talk to engineers in their own language (HTML, SCSS, JavaScript). B2B SaaS, enterprise, logistics, EdTech — I've made complicated things feel calm across all of them.

EXPERIENCE

Lead Product Designer (Team Lead)

May 2024 – Present

Hitachi Vantara · Hyderabad, India

- ❖ Lead and mentor a team of 5 product designers across a portfolio of 5 presales engineering tools — storage sizing, TCO calculation and customer infrastructure monitoring — used by Hitachi Vantara's sales engineering organisation worldwide.
- ❖ Built and now maintain a shared design system across the portfolio, which reduced UI inconsistencies by 35% and removed duplicate design and front-end work between product teams.
- ❖ Own design strategy from discovery to release: run stakeholder sessions as structured research, present 3–4 different design directions per initiative and keep the team on short ship-and-iterate cycles.
- ❖ Work closely with product managers and engineers to plan roadmaps, agree on scope, and make sure designs are realistic to build within each release.
- ❖ Set up regular design reviews and a clear feedback routine so the team holds a consistent quality bar across all five products.
- ❖ Added shared component documentation and design tokens so developers can pick up handoffs faster and with fewer questions.
- ❖ Received Hitachi's Platinum Award (Kaitakusha Seishin) for outstanding contribution to the design and user experience of large-scale web projects.

Senior User Experience Designer

Oct 2021 – May 2024

Hitachi Vantara · Hyderabad, India

- ❖ Led the redesign of the web channel, which helped increase conversion rates by 20% through experimentation and analysis of user-behaviour data.
- ❖ Ran extensive user research to find pain points and released targeted features that improved user retention by 20%.
- ❖ Acted as the design authority for the web domain - wrote design guidelines and best practices and ran design reviews for other product squads.
- ❖ Created and validated concepts and interactive prototypes in Figma, Adobe XD and After Effects, taking features from first idea to a working release with cross-functional teams.

- ❖ Turned research findings into clear user flows and wireframes that the wider team could review and agree on before build started.
- ❖ Worked side by side with developers during build to check spacing, states and behaviour so the shipped product matched the design.

Product Designer — Logistics

May 2020 – Aug 2021

Teleport (AirAsia Group) · Kuala Lumpur, Malaysia

- ❖ Designed the Teleport App order-placement experience for AirAsia's logistics arm during its rapid pandemic-era expansion, which improved operational efficiency by 25%.
- ❖ Reduced drop-off rates by 30% through persona and journey-map driven redesigns and cut mockup delivery time by 20% by streamlining the design process within a shared design-system framework.
- ❖ Mapped the full order journey end to end to find the steps where users struggled and reworked those screens first.
- ❖ Worked with product and operations teams to understand real warehouse and delivery constraints and reflected them in the design.
- ❖ Built and maintained reusable components for the app so new screens could be put together quickly and stay consistent.
- ❖ Tested prototypes with users and made changes based on their feedback before handing designs to developers.

Senior UI Designer

Oct 2017 – Mar 2020

Mandrill Tech Sdn Bhd · Kuala Lumpur, Malaysia

- ❖ Led UX/UI and interaction design for ServeDeck, a smart facility-operations platform, across web and mobile — the mobile interface work contributed to a 15% increase in app downloads and a 10% lift in user satisfaction.
- ❖ Owned the full design cycle — personas, customer journeys and flows through to high-fidelity specs — and built interactive prototypes that streamlined developer handoff.
- ❖ Designed clear layouts for complex operational data so facility teams could read and act on information quickly.
- ❖ Created a set of shared UI patterns and styles that kept the web and mobile products looking consistent.
- ❖ Worked closely with developers throughout the build to keep the final product close to the design.
- ❖ Gathered feedback from early users and used it to refine flows and simplify the interface.

Product Designer

Nov 2015 – Oct 2017

Wiedu Sdn Bhd · Kuala Lumpur, Malaysia

- ❖ Reduced customer support tickets by 25% by resolving navigation challenges with clearer, more intuitive interfaces.
- ❖ Established design guidelines that improved overall user satisfaction by 20%.
- ❖ Redesigned key screens based on common user questions and complaints to make everyday tasks easier.
- ❖ Created wireframes and prototypes to test ideas early and agree on direction with the team before build.
- ❖ Worked with developers to make sure designs were built correctly and worked well across devices.
- ❖ Kept a simple, shared set of UI components so screens stayed consistent as the product grew.

Senior UI Designer
Optimizer HQ · Kuala Lumpur, Malaysia

2014 – 2015

- ❖ Handled mobile-first interface and visual design work that contributed to a 15% increase in user engagement.
- ❖ Created clean, responsive layouts that worked well on smaller screens.
- ❖ Built and maintained UI assets and style elements to keep the product visually consistent.
- ❖ Worked with the development team to turn designs into working screens.
- ❖ Made small, regular improvements to the interface based on user feedback.

UI Designer / System Engineer
Centre of Technology & Innovation · Kuala Lumpur, Malaysia

2012 – 2014

- ❖ Streamlined design workflows, which improved delivery times by 20%.
- ❖ Designed user interfaces and supported the technical side of putting them into production.
- ❖ Created reusable templates and assets to speed up repeat work.
- ❖ Worked across design and engineering to keep projects moving smoothly.
- ❖ Documented simple design and process guidelines for the team to follow.

SKILLS

Core: User experience (UX) design · User interface (UI) design · Enterprise UX · B2B SaaS product design · Design systems & component libraries · Interaction design · Information architecture · Wireframing & user flows · Prototyping · Usability & A/B testing · User research (personas, journey mapping) · Responsive & mobile-first design · Accessibility (WCAG 2.2, European Accessibility Act)

Tools: Figma (advanced) · Fig Jam · Adobe XD · Sketch · After Effects · Google Analytics · Miro · Notion · Jira · Generative AI in design workflows (certified, Growth School)

Front-end: HTML5 · CSS / SCSS · JavaScript (working knowledge) · design-token and developer handoff · close collaboration with engineering on implementation quality

Leadership: Team leadership & mentoring (5 designers) · Design ops & review processes · Stakeholder management · Cross-functional agile delivery (Scrum)

EDUCATION & LANGUAGES

BSc (Hons) Computer Games Development — Asia Pacific University, Malaysia (CGPA 3.1) 2009 – 2012

Recognition: Platinum Award, Kaitakusha Seishin (Hitachi) · Next Design System collaborator — scalable design systems across multiple platforms

Courses: ChatGPT & Generative AI for Designers (Growth School) · UX Design Essentials & UI Design Principles (Hitachi) · Web Design Essential Principles (Udemy)

Languages: English (fluent) · Hindi (native)
